*This model is flush mounted, completely inconspicuous in-ground installation.

*As the name suggests it offers flat surface on the road.

*Spike Tyre Killer can be integrated with Boom Barrier to work in unison with single activation device and control panel.

*This enables the spikes to go down automatically when the barrier is open and come up when the barrier is closed.

* Can destroy all types of tyres irrespective of drive unit.

* Can be integrated and operated through any access control system.

Accessories (Optional)

1. Emergency Button with Lock down
2. Traffic Light
3. Remote Controller
4. Pair of Photocell Safety Beam
5. Access Control System
